

Indoor courts fall into three main categories – a variety of indoor surfaces designed for Clubs and commercial Centres; specialised top level coaching courts e.g., The National Tennis Centre, the LTA Academies and other centres of tennis excellence and tournament courts for Davis Cup, ATP and similar events with occasional residential indoor courts. Doe can design and install tailor made solutions for every type of indoor tennis requirement and will be pleased to help with indoor projects from the concept stage onwards.

PERFORMANCE

DOE CHAMPION as installed at The National Tennis Centre in London – comprises a sprung timber base overlaid with the **GreenSet® GRAND PRIX ACRYLIC** resin offering 58% shock absorbency which delivers an exceptionally comfortable and forgiving surface for joints and tendons during long, intense coaching sessions. The six indoor **CHAMPION** courts were specially designed to accommodate the underfloor heating at The NTC and are unique in the world of tennis.

Doe can offer several versions of 'timber' based courts to suit both existing and new build halls as well as the **GreenSet® ACRYLIC** tournament courts on wood as used for many Davis Cup Ties.

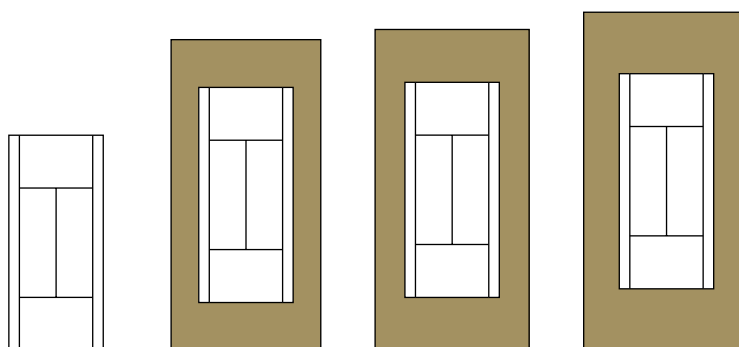

CONFORT is a deeply cushioned **GreenSet® ACRYLIC** court comprising a pre-fabricated rubber shock pad overlaid with the **GreenSet® GRAND PRIX ACRYLIC** tennis playing surface. It is installed at many well known tennis training centres in Europe.

GreenSet® GRAND PRIX Cushion and **GRAND PRIX** (described on our **GreenSet® ACRYLIC** Court leaflet) are both eminently suitable for indoor courts and have been installed at ITI centres, the LTA Academy at University of Bath and specialist Sports Colleges as well as in Clubs and commercial Centres.

GreenSet® TROPHY is a pvc, cold welded sheet material often used for event courts such as the ATP Tour Champions/AEGON Masters event held at the Albert Hall. The surface is 'reversible' with a double life span. When both sides have reached maximum playability, the surface may be coated with a special acrylic resin to provide a very comfortable cushioned surface for a few more years. Because of its comparatively high maintenance requirements **TROPHY** is not recommended for Clubs and Centres looking for minimal routine maintenance.

DOE VELVELUX is an indoor velour tennis carpet offering a warm and welcoming tennis environment which is very popular with top level clubs and their family members. It can be installed over sprung timber or over a suitably constructed concrete screed.

COURT SIZES

	Playing Area	Residential Courts Normal Minimum	LTA Recommended Minimum Size	LTA Recommended Full Size
Overall enclosure for one court:	23.77m x 10.97m (78' x 36')	33.53m x 16.46m (110' x 54')	34.75m x 17.07m (114' x 56')	36.58m x 18.29m (120' x 60')

The information contained in this leaflet may be subject to alteration without notice.
